Profile

SUMMARYMARK. Delivered measurable improvements across the platform by profiling hot paths, removing redundant network round-trips and introducing a caching layer that cut median response time substantially while keeping the public contract unchanged. Delivered measurable improvements across the platform by profiling hot paths, removing redundant network round-trips and introducing a caching layer that cut median response time substantially while keeping the public contract unchanged.

Employment

Senior Engineer Role 1

Employer Number 1 Limited · Jan 2011 — Present

Delivered measurable improvements across the platform by profiling hot paths, removing redundant network round-trips and introducing a caching layer that cut median response time substantially while keeping the public contract unchanged. Engagement marker ROLEDESC1.

- Achievement BULLET1x0 — Delivered measurable improvements across the platform by profiling hot paths, removing redundant network round-trips and introducing a caching layer that cut median response time substantially while keeping the public contract unchanged.
- Achievement BULLET1x1 — Delivered measurable improvements across the platform by profiling hot paths, removing redundant network round-trips and introducing a caching layer that cut median response time substantially while keeping the public contract unchanged.
- Achievement BULLET1x2 — Delivered measurable improvements across the platform by profiling hot paths, removing redundant network round-trips and introducing a caching layer that cut median response time substantially while keeping the public contract unchanged.
- Achievement BULLET1x3 — Delivered measurable improvements across the platform by profiling hot paths, removing redundant network round-trips and introducing a caching layer that cut median response time substantially while keeping the public contract unchanged.
- Achievement BULLET1x4 — Delivered measurable improvements across the platform by profiling hot paths, removing redundant network round-trips and introducing a caching layer that cut median response time substantially while keeping the public contract unchanged.
- Achievement BULLET1x5 — Delivered measurable improvements across the platform by profiling hot paths, removing redundant network round-trips and introducing a caching layer that cut median response time substantially while keeping the public contract unchanged.

Senior Engineer Role 2

Employer Number 2 Limited · Jan 2012 — Dec 2013

Delivered measurable improvements across the platform by profiling hot paths, removing redundant network round-trips and introducing a caching layer that cut median response time substantially while keeping the public contract unchanged. Engagement marker ROLEDESC2.

- Achievement BULLET2x0 — Delivered measurable improvements across the platform by profiling hot paths, removing redundant network round-trips and introducing a caching layer that cut median response time substantially while keeping the public contract unchanged.
- Achievement BULLET2x1 — Delivered measurable improvements across the platform by profiling hot paths, removing redundant network round-trips and introducing a caching layer that cut median response time substantially while keeping the public contract unchanged.

- ### Senior Engineer Role 3

Delivered measurable improvements across the platform by profiling hot paths, removing redundant network round-trips and introducing a caching layer that cut median response time substantially while keeping the public contract unchanged. Engagement marker ROLEDESC3.

- ### Senior Engineer Role 4

Delivered measurable improvements across the platform by profiling hot paths, removing redundant network round-trips and introducing a caching layer that cut median response time substantially while keeping the public contract unchanged. Engagement marker ROLEDESC4.

- 2 / 4

- Achievement BULLET6x4 — Delivered measurable improvements across the platform by profiling hot paths, removing redundant network round-trips and introducing a caching layer that cut median response time substantially while keeping the public contract unchanged.
- Achievement BULLET6x5 — Delivered measurable improvements across the platform by profiling hot paths, removing redundant network round-trips and introducing a caching layer that cut median response time substantially while keeping the public contract unchanged.

Education

MSc Advanced Computer Science

University of Manchester · Sep 2008 — Jul 2009

Subjects: Distributed Systems, Machine Learning

Grade: Distinction

- EDUBULLETA thesis on consensus protocols
- EDUBULLETB teaching assistant

BSc Computer Science

University of Leeds · Sep 2005 — Jul 2008

Subjects: Software Engineering

Grade: First Class Honours

Skills

TypeScript · React · Node.js · PostgreSQL · Kubernetes · Terraform · GraphQL · SKILLKEPT

Languages

English (Native) · French (Fluent) · German (Intermediate)

Hobbies

Long-distance running · Chess · HOBBYMARK woodworking

Certifications

CUSTOMPARA holder of several **cloud certifications** and *security accreditations*.

- CUSTOMLI1 AWS Solutions Architect & Professional
- CUSTOMLI2 Certified Kubernetes Administrator

Speaking

CUSTOMH3 Conferences

CUSTOMPARA2 Regular speaker on platform topics.
